November issue includes abridged index to yearly volume. Updated in its 5th edition, Papper's Broadcast News and Writing Stylebook is the first and most widely used handbook in broadcast news. This book clearly and concisely outlines the rules of broadcast news writing, reporting, grammar, style, and usage. With chapter-by-chapter coverage of story types, from business stories to crime and legal reporting, education, government, health, the environment, weather, and sports, the Broadcast News and Writing Stylebook lays out the particular demands of composition, form, style, and usage in all the diverse areas of broadcast news. Because the news business has changed -- and continues to evolve -- so has this text. Written by the person who has overseen the major industry research for the past 18 years, the latest edition looks into the future of news by exploring the business of news. Citing the latest data and trends, the book takes a hard look at where the industry stands and where it appears to be headed. World Port Index (Pub 150) contains the location, characteristics, known facilities, and available services of major ports, shipping facilities and oil terminals throughout the world (approximately 64,000 entries). Major natural hazards have sparked growing public concern worldwide. This book provides new information on Typhoon Impact and Crisis Management using satellite remote sensing technology, linking the natural sciences and social sciences in typhoon studies. It examines remote sensing observations of typhoons (hurricanes), typhoon impacts on the environment, typhoon impacts on marine ecosystems, typhoon impacts and global changes, typhoon (hurricane) impacts on economics, and crisis management for typhoon (hurricane) disasters. Changes in the economy required business professionals and researchers to learn about new sources of information, as well as to expand their understanding of international business subjects. The sources, language, document coding, and definitions are different -- truly foreign. International Business Information was written to help business The book presents the analysis and control of numerous DC-DC converters widely used in several applications such as standalone, grid integration, and motor drives-based renewable energy systems. The book provides extensive simulation and practical analysis of recent and advanced DC-DC power converter topologies. This self-contained book contributes to DC-DC converters design, control techniques, and industrial as well as domestic applications of renewable energy systems. This volume will be useful for undergraduate/postgraduate students, energy planners, designers, system analysis, and system governors. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. The image is modified based on Figure 1a of Lucey et al. (this Research Topic) and Figure 7b of Niemi et al. (this Research Topic). (A) Graphical depiction of atmospheric warming and increasing atmospheric carbon dioxide (CO₂atm), which drives ocean warming, contribute to the decreases in dissolved oxygen (DO), and lowers pH and saturation state index of calcium carbonate (?). The partial pressure of CO₂ (pCO₂) increases due to increasing atmospheric CO₂ that is absorbed into the seawater (i.e., ocean acidification), along with other biological processes in the marine environment. Amundsen Gulf. Front. Mar. Sci. 8:600184. doi: 10.3389/fmars.2021.600184 This book is a printed edition of the Special Issue "X-Ray Free-Electron Laser" that was published in Applied Sciences Sustainable Crop Productivity and Quality under Climate Change: Responses of Crop Plants to Climate Change explores the physiological, biochemical and molecular bases of the responses of major crop plants to a range of climate change scenarios, including the development of climate resilience crop varieties that lead to enhanced crop productivity and quality under stressful conditions. The book presents a much-needed mechanistic understanding on the interactions between multiple stress responses of plants needed to identify and take advantage of acclimation traits in major crop species as a prerequisite for securing robust yields and good quality. This is an excellent reference book for plant scientists, advanced level students and frontline researchers working on plant/crop ecophysiology/stress physiology, as well as those sustaining crop production under climate change. Includes physiological, biochemical and molecular response of major crop plants to climate change related stresses Informs breeding for developing climate resilient crop varieties Represents the latest developments and advances from leading researchers Organic animal production has increased rapidly in recent years to keep up with the increasing consumer demand for organic meats. There are many guidelines and restrictions on what should go into the feedstuffs of organically farmed animals, from which difficulties arise when trying to ensure a well-balanced, nutritious diet without the use of any supplements. The book has been completely updated and revised to address how to formulate organic diets in situations where there is a declining supply of organic feed, as well as the feasibility of utilizing novel feedstuffs and their acceptability by consumers of organic meat products. Including the experiences of producers in relation to appropriate breeds and production systems for forage-based organic production, this book is an important read for researchers and students of organic food animal production, veterinary sciences and food; as well as food industry personnel and organic farmers. Includes a statistical issue (title varies slightly) 1947- Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured. "Geotechnical Engineering for Disaster Mitigation and Rehabilitation" presents the latest developments and case studies in the field. All contributions to this proceedings were rigorously reviewed to cover the newest developments in disasters related to earthquakes, landslides and slopes, soil dynamics, risk assessment and management, disaster mitigation and rehabilitation, and others. The book will be a useful reference for geotechnical scientists, engineers and professionals in these areas. The only guide to Southeast Asia that covers the entire length and breadth of a region frequently visited by round-the-world sailors, many of whom leave Australia to head west. This 2008 edition concentrates on the most frequented routes and includes the most popular stops. There are hundreds of possible anchorages, the most popular of which are usefully summarised in tables. Introductory sections cover planning and the last part of the book deals with more general topics including advice on provisioning and the problems that are often faced by cruisers. Stephen Morgan and Elaine Davies first arrived in the region over 30 years ago. They work in Hong Kong- Stephen Davies as Director of the Hong Kong Maritime Museum and Elaine Morgan as a writer and editor. While this pilot is aimed at yachtsmen and indeed was surveyed from the Davies/Morgan yacht, it is just as relevant to the commercial or military mariner. The part of the world described in this work is one of the most interesting on our planet. Culturally, scenically, climatically and commercially- it has everything. This excellent book - now in its second edition, describes it all very enticingly. Set to the usual high standard of the Imray pilots that precede it, this one is spiced up by the wit and anecdotes the authors are so good at.
