The latest cycle of national educational critiques and reforms has created an interest in gaining historical leverage on teacher education. With a broad audience in mind, Professor Allison provides a case study of the work of teacher educators in the academy and the -field.- He critically examines educationists' scholarship, status in the university, service to school and teachers, and impulse to engage in social reform. This is the first book-length study of the history of teacher education in the South." Following his acclaimed history of the Situationist International up until the late sixties, *The Beach Beneath the Street*, McKenzie Wark returns with a companion volume which puts the late work of the Situationists in a broader and deeper context, charting their contemporary relevance and their deep critique of modernity. Wark builds on their work to map the historical stages of the society of the spectacle, from the diffuse to the integrated to what he calls the disintegrating spectacle. *The Spectacle of Disintegration* takes the reader through the critique of political aesthetics of former Situationist T.J. Clark, the Fourierist utopia of Raoul Vaneigem, René Vienet's earthy situationist cinema, Gianfranco Sanguinetti's pranking of the Italian ruling class, Alice-Becker Ho's account of the anonymous language of the Romany, Guy Debord's late films and his surprising work as a game designer. At once an extraordinary counter history of radical praxis and a call to arms in

the age of financial crisis and the resurgence of the streets, *The Spectacle of Disintegration* recalls the hidden journeys taken in the attempt to leave the twentieth century, and plots an exit from the twenty first. The dustjacket unfolds to reveal a fold-out poster of the collaborative graphic essay combining text selected by McKenzie Wark with composition and drawings by Kevin C. Pyle. Jesus, Moses, Mohammed, Gandhi, and the Buddha all had brains built essentially like anyone else's, yet they were able to harness their thoughts and shape their patterns of thinking in ways that changed history. With new breakthroughs in modern neuroscience and the wisdom of thousands of years of contemplative practice, it is possible for us to ... Drawing from hundreds of studies in half a dozen fields, *The Brighter Side of Human Nature* makes a powerful case that caring and generosity are just as natural as selfishness and aggression. This lively refutation of cynical assumptions about our species considers the nature of empathy and the causes of war, why we (incorrectly) explain all behavior in terms of self-interest, and how we can teach children to care. "We are in the midst of a powerful psychedelic renaissance. After four decades of hibernation, the promise of the psychoactive '60s--that deeper self-awareness, achieved through reality-bending substances and practices, will lead to greater external harmony--is again gaining a major following. The signs are everywhere, from the influence of today's preeminent psychedelic thinker Daniel Pinchbeck, to the renewed interest in the legacy of Terence McKenna, and to the upsurge of collective, inclusive (and overtly tripped-out) cultural phenomena like the spectacle of Burning Man. *The Psychedelic Experience*, created in the movement's early years by the prophetic shaman-professors Timothy Leary, Ralph Metzner, and Richard Alpert (Ram Dass), is a foundational text that serves as a model and a guide for all subsequent mind-expanding inquiries. In this wholly unique book, the authors provide an interpretation of an ancient sacred manuscript, *The Tibetan Book of the Dead*, from a psychedelic perspective. *The Psychedelic Experience* describes their discoveries in broadening spiritual consciousness through a combination of Tibetan meditation techniques and psychotropic substances."--Amazon.com. Alexander Berkman was a twentieth-century American revolutionary. Like the abolitionist John Brown before him, Berkman was hugely idealistic, ready to go to the furthest extreme of self-sacrifice and violence on behalf of justice and civil rights. He decided to assassinate industrialist Henry Clay Frick after reading in the newspaper that Pinkertons hired by Frick had opened fire on the Homestead strikers, killing men, women, and children. Berkman's bungled attempt cost him fifteen years in a federal penitentiary. Upon his release, he became an effective agitator against conscription and was again imprisoned and eventually deported to Russia, where he saw at first hand the early days of Bolshevism. Berkman's writings remain a lasting and

impassioned record of intense political transformation. Featuring a new introduction by Howard Zinn, *Life of an Anarchist* contains *Prison Memoirs of an Anarchist*, Berkman's account of his years in prison; *The Bolshevik Myth*, his eyewitness account of the early days of the Russian Revolution; and *The ABC of Anarchism*, the classic text on the nature of anarchism in the twentieth century. Also included are a selection of letters between Berkman and his lifelong companion Emma Goldman, and a generous sampling from Berkman's other publications.

Walt Whitman (1819-92) is the authentic voice of democratic America. After a childhood in Brooklyn, he spent many years in and around Manhattan and Washington, where he witnessed troops returning from the Civil War and tended wounded soldiers in the camp hospitals. Whitman's broad humanity, his love of cities (especially Manhattan), his sympathy with all conditions of people, and his visionary - even prophetic - sense of the reality of the American dream make him as much a poet for our time as he was for the time of the American Civil War and its aftermath. This selection of courageous and consoling poems focuses on Whitman's vision of democracy, his love of Manhattan, his sense of the future - and of the community of peoples of this earth. "This book offers a short, spirited defense of rhetoric and the liberal arts as catalysts for precision, invention, and empathy in today's world. The author, a professor of Shakespeare studies at a liberal arts college and a parent of school-age children, argues that high-stakes testing and a culture of assessment have altered how and what students are taught, as courses across the arts, humanities, and sciences increasingly are set aside to make room for joyless, mechanical reading and math instruction. Students have been robbed of a complete education, their imaginations stunted by this myopic focus on bare literacy and numeracy. Education is about thinking, Newstok argues, rather than the mastery of a set of rigidly defined skills, and the seemingly rigid pedagogy of the English Renaissance produced some of the most compelling and influential examples of liberated thinking. Each of the fourteen chapters explores an essential element of Shakespeare's world and work, aligns it with the ideas of other thinkers and writers in modern times, and suggests opportunities for further reading. Chapters on craft, technology, attention, freedom, and related topics combine past and present ideas about education to build a case for the value of the past, the pleasure of thinking, and the limitations of modern educational practices and prejudices"-- This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. In *Presenting to Win: Persuading Your Audience Every Time*, the world's #1 presentation consultant shows how to connect with even the toughest, most high-level audiences--and move them to action. Jerry Weissman shows presenters of all kinds how to dump those PowerPoint templates once and for all--and learn to tell compelling stories that focus on what's in it for their listeners. Drawing on dozens of practical examples and real case studies, Weissman shows presenters how to identify their real goals and messages before they even open PowerPoint; how to stay focused on what their listeners really care about; and how to capture their audiences in the first crucial 90 seconds. From bullets and graphics to the effective, sparing use of special effects, Weissman covers all the practical mechanics of effective presentation--and walks readers through every step of building a Power Presentation, from brainstorming through delivery. Unlike the techniques in other presentation books, this book's easy, step-by-step approach has been proven with billions of dollars on the line, in hundreds of IPO road shows before the world's most jaded investors. Nowadays the 3D-Integration technologies, 3D-Design techniques, and 3D-Architectures are emerging as interesting, truly hot, broad topics. The present book gathers the recent advances in the whole domain by renowned experts in the field to build a comprehensive and consistent book around the hot topics of

three-dimensional architectures and micro-architectures. This book includes contributions from high level international teams working in this field. Upton Sinclair, one of America's foremost and most prolific authors, addresses the cultivation of the mind and the body in this 1922 volume. Sinclair's goal was to attempt to tell the reader how to live, how to find health, happiness and success, and how to develop fully both the mind and the body. Part One: The Book of the Mind covers such subjects as faith, reason, morality, and the subconscious. Part Two: The Book of the Body develops such subjects as errors in diet, the fasting cure, food and poisons, work and play, and diseases and their cures . - An exhaustive appraisal of the Rolex watch, including studies of vintage models, current designs and special editions- Learn how to spot fakes using the same clues as the experts- Invaluable to any watch-lover, especially aspiring Rolex collectorsHorological trends flit by faster than ever in today's fast-paced society. But Rolex does not rely on gimmicks; theirs is a more perennial allure, with a reputation built on traditions and hard-earned skill. A company that innovates while paying homage to their roots, every Rolex is the cumulation of centuries of watchmaking expertise. Within this book you will find explanations of the making process, descriptions of the materials involved and expert commentary on what makes each Rolex wristwatch unique. The Book of Rolex demonstrates how each model fits its social milieu, present and past. It also addresses the multitude of fakes on the market, including the so-called 'Frankensteins' - watches made from a mixture of real parts and forgeries, which are notoriously hard to spot - imparting all the skills needed to pick counterfeits out of a line-up. A holistic view of Rolex watches, this book promises to be as timeless as the brand itself. Should you be considering a Rolex, this book will convince you of its worth as an investment. Focusing on the principal mediations used by Hindu and Tibetan gurus and philosophers, this companion volume to "Tibetan Book of the Dead" contains seven authentic Tibetan yoga texts, each accompanied by introductory notes and commentary. Includes photos and reproductions of yoga paintings and manuscripts. 9 halftones. This new edition covers iPhoto 9.5 for Mac and iPhoto 2.0 for iOS 7. (iPhoto is not available in iOS 8.) Whether you're on a Mac or iOS 7 device, iPhoto now makes it easier than ever to organize, edit, publish, print, and share your photosbut neither version of the program offers a manual to help you get going. Fortunately, David Pogue and Lesa Snider offer a clear and objective guide to iPhoto in this witty, authoritative book. The important stuff you need to know Since the early 1990s there has been a trend towards narrative complexity within popular cinema. This book examines a number of contemporary films that play overtly with narrative structure, raising questions of chance and destiny, memory and history, simultaneity and the representation of time. This book covers

key concepts in the design of 2D and 3D Network-on-Chip interconnect. It highlights design challenges and discusses fundamentals of NoC technology, including architectures, algorithms and tools. Coverage focuses on topology exploration for both 2D and 3D NoCs, routing algorithms, NoC router design, NoC-based system integration, verification and testing, and NoC reliability. Case studies are used to illuminate new design methodologies. In 2007 The Design, Automation and Test in Europe (DATE) conference celebrated its tenth anniversary. As a tribute to the chip and system-level design and design technology community, this book presents a compilation of the three most influential papers of each year. This provides an excellent historical overview of the evolution of a domain that contributed substantially to the growth and competitiveness of the circuit electronics and systems industry. One of the greatest challenges faced by designers of digital systems is optimizing the communication and interconnection between system components. Interconnection networks offer an attractive and economical solution to this communication crisis and are fast becoming pervasive in digital systems. Current trends suggest that this communication bottleneck will be even more problematic when designing future generations of machines. Consequently, the anatomy of an interconnection network router and science of interconnection network design will only grow in importance in the coming years. This book offers a detailed and comprehensive presentation of the basic principles of interconnection network design, clearly illustrating them with numerous examples, chapter exercises, and case studies. It incorporates hardware-level descriptions of concepts, allowing a designer to see all the steps of the process from abstract design to concrete implementation. Case studies throughout the book draw on extensive author experience in designing interconnection networks over a period of more than twenty years, providing real world examples of what works, and what doesn't. Tightly couples concepts with implementation costs to facilitate a deeper understanding of the tradeoffs in the design of a practical network. A set of examples and exercises in every chapter help the reader to fully understand all the implications of every design decision. "The Life, Crime, and Capture of John Wilkes Booth" by George Alfred Townsend. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten-or yet undiscovered gems-of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. A complete explanation of the esoteric principles of Mantra that also clarifies the differences between Hindu and Tibetan yoga. Translated into many languages, this is an important text for any student of

Buddhism. With bibliography, index, and illustrations. Derived from a Buddhist funerary text, this famous volume's timeless wisdom includes instructions for attaining enlightenment, preparing for the process of dying, and moving through the various stages of rebirth. Novel based on Pirates and buried gold of Treasure Island (Imaginary place). In clear, impassioned prose, Enrico Manicardi analyzes the evils of our age from their genesis. This or that economic, technological or cultural model is not to blame for our current crisis; the blame lies with economics, technology and culture as such. It is the ideology of fear that makes us afraid. It is the mentality of domination that jeopardizes all of our relationships. In short, the problem is civilization. Through its oppressive classes, values and processes that pervade everyone's life, civilization domesticates us, weakens our perceptiveness and distances us from the living world. We must radically change our way of thinking, feeling and behaving before it's too late—we must dam the flood of devitalization that is washing over us, and return to our wilder natures, both inside and outside ourselves. Manicardi's appeal is crystal clear: if we are to survive we must begin to search inside ourselves, not to celebrate the distant past as if it were a cult, but to return to ourselves, to grip life with our own two hands, and build upon that earlier ecocentric conscience which once held the place of the egocentric conscience now leading us astray. Enrico Manicardi was born in 1966 and is a member of La Scintilla, the Society for Libertarian Culture of Modena. A lawyer and founder of the antiauthoritarian media project "Infection," he has also played guitar and written music for an eponymous band since the 1980s. His lifelong wish has been to live in a free, radically off-kilter, ecologically sound world, one characterized by warm, spontaneous, non-hierarchical relationships rather than those consecrated by the cult of technology. Troubled by the way people have succumbed to a civilization that estranges, domesticates and regulates everything and everyone, he continues to protest against the modern world's project to enslave us. This book augurs the rise of an increasingly harmonious chorus loud enough to put an end to that project.

A classic on the aesthetics of filmmaking from the pioneering Soviet director who made Battleship Potemkin. Though he completed only a half-dozen films, Sergei Eisenstein remains one of the great names in filmmaking, and is also renowned for his theory and analysis of the medium. *Film Form* collects twelve essays, written between 1928 and 1945, that demonstrate key points in the development of Eisenstein's film theory and in particular his analysis of the sound-film medium. Edited, translated, and with an introduction by Jay Leyda, this volume allows modern-day film students and fans to gain insights from the man who produced classics such as *Alexander Nevsky* and *Ivan the Terrible* and created the renowned "Odessa Steps" sequence. *The Last Mentsch* is a work of historical fiction told to the interlocutor by Yitzhak, the

son of Theodore Isaacs. It covers a period of almost 125 years in a time of tumultuous political, economic and social change in Southern Africa. The novel uncovers one of the missing pieces of that time - a story of a Jewish child pioneer, hustled out of Europe in the mid-nineteenth century to escape increasing waves of anti-Semitic 'justice' meted out in the ghettos and shtetls of Europe. In essence the book is an adventure set in a multicultural society, when a great many of the earliest pioneers were little more than children. It is a story, which, while set in Southern Africa, also resonates with generations on people whose forebears arrived alone in South Africa, Australia, Israel, the United States, Canada, New Zealand ... and indeed, throughout the world, wherever the British Empire planted its flags. Our research on literacy has produced considerable information about literacy demands of jobs, job proficiency of men of various literacy skill levels, methodologies for estimating literacy demands of jobs, and efforts to modify men and jobs to better match men to jobs. While this research has been reported for public use, the information is presented in technical reports, journal articles, and HumRRO publications of limited distribution. Because many of these varied documents are widely dispersed and hard to obtain, it was deemed desirable to make a summation of this research available in this single volume. Part I reports research to develop general methodologies for estimating functional literacy demands of jobs. Each of four chapters describes an approach to this problem; a fifth chapter presents a general summary and critical discussion of the various methods of estimating reading requirements of jobs used in this research and by others. Part II is concerned with methods of reducing discrepancies between personnel literacy skills and the literacy demands of jobs. The first chapter describes basic research on reducing reading demands of training schools by substituting listening for reading, and comments on preparing job and training aids capable of being more effectively used by less literate personnel. The second chapter describes an extensive R & D effort to design, develop, and implement a job-related literacy training program for the Army - an effort still under way at this writing. While changes undoubtedly will be made to the program as reported, the chapter is offered as an example of one approach to teaching reading "in the content areas" on a large scale. Table of contents: Introduction Part I: Determining Functional Literacy Demands of Jobs * Introduction * Readability of Job Materials * Performing Job Reading Task * Literacy in Relation to Job Knowledge, Job Performance, and Supervisor Ratings * Using Personnel Data Files to Estimate Reading Demands of Jobs * Commentary on Methodologies for Determining Literacy Demands of Jobs Part II: Reducing Discrepancies Between Literacy Skills of Personnel and Literacy Demands of Jobs * Introduction * Methods for Reducing Literacy Demands of Jobs. * Functional Literacy Training: A Case Study

Part III: Collected Papers on Functional Literacy * Introduction * Reading and Career Education * A Career-Oriented Literacy Training System for the Armed Services * Needed: A Functional Literacy Curriculum for the Secondary School. Award-winning author of *Under the Feet of Jesus*, Helena María Viramontes offers a profoundly gritty portrait of everyday life in L.A. in this lyrically muscular, artfully crafted novel. In the barrio of East Los Angeles, a group of unbreakable young women struggle to find their way through the turbulent urban landscape of the 1960s. Androgynous Turtle is a homeless gang member. Ana devotes herself to a mentally ill brother. Ermila is a teenager poised between childhood and political consciousness. And Tranquilina, the daughter of missionaries, finds hope in faith. In prose that is potent and street tough, Viramontes has choreographed a tragic dance of death and rebirth. Julia Alvarez has called Viramontes "one of the important multicultural voices of American literature." *Their Dogs Came with Them* further proves the depth and talent of this essential author. Helena María Viramontes is the acclaimed author of *The Moths and Other Stories* and *Under the Feet of Jesus*, a novel; and the coeditor, with María Herrera-Sobek, of two collections: *Chicana (W)Rites: On Word and Film* and *Chicana Creativity and Criticism*. She is the recipient of the 2006 Luis Leal Award and the John Dos Passos Award for Literature, and her short stories and essays have been widely anthologized and adopted for classroom use and university study. Viramontes lives in Ithaca, New York, where she is a professor in the Department of English at Cornell University.

Multicore Processors and Systems provides a comprehensive overview of emerging multicore processors and systems. It covers technology trends affecting multicores, multicore architecture innovations, multicore software innovations, and case studies of state-of-the-art commercial multicore systems. A cross-cutting theme of the book is the challenges associated with scaling up multicore systems to hundreds of cores. The book provides an overview of significant developments in the architectures for multicore processors and systems. It includes chapters on fundamental requirements for multicore systems, including processing, memory systems, and interconnect. It also includes several case studies on commercial multicore systems that have recently been developed and deployed across multiple application domains. The architecture chapters focus on innovative multicore execution models as well as infrastructure for multicores, including memory systems and on-chip interconnections. The case studies examine multicore implementations across different application domains, including general purpose, server, media/broadband, network processing, and signal processing. *Multicore Processors and Systems* is the first book that focuses solely on multicore processors and systems, and in particular on the unique technology implications, architectures, and implementations. The book has contributing authors that are from both

the academic and industrial communities. The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account. Teaching Christianity is the most original book Augustine ever wrote. It is not so much a treatise or scholarly work but an instruction manual on how to teach Christianity. He wrote this how to book for those who would be preaching and explaining Christianity. It is entirely based on the bible and helps the reader express its truths of faith with soundproof methodology. It is a book that will help readers to communicate their message in a clear and effective way. Edmund Hills new translation of Augustines treatise On Christian Doctrine is superb. His early and mature thought on how to understand scripture and how to communicate that understanding to others is set forth clearly and attractively. The translator has shown great discernment in his choice of words and in their placement. This makes for a smooth reading. Extremely valuable are the scholarly endnotes provided after each of the four books. The new title chosen by Edmund Hill, namely, Teaching Christianity indicates that Augustine is here instructing the African clergy, probably the bishops, how to preach effectively to their congregations. The treatise is not focused on doctrine. Sr. Mary T. Clark, RSCJ Manhattanville College President, Society for Medieval and Renaissance Philosophy
