ELMSIM was developed in 1974-1975 as an interim measure to assist in the evaluation of the number and distribution of spare aircraft engines of the U.S. Navy pending the development of a four maintenance echelon analytical technique, NAVMET (to be published as Report R-7511), and also for use in evaluating changes in assumptions and results of NAVMET. The model simulates the removal of engines from aircraft at an operating base and their subsequent flow through the base or depot repair or overhaul process and transit pipelines. The report describes the model, and includes a program listing and a description of variables. It discusses assumptions, calculations, output reports and analytical applications. (Author). The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics. POWER EQUIPMENT ENGINE TECHNOLOGY (PEET) is designed to meet the basic needs of students interested in the subject of small engine repair by helping instructors present information that will aid in the student's learning experience. The subject matter is intended to help students become more qualified employment candidates for repair shops looking for well-prepared, entry-level technicians. PEET has been written to make the learning experience enjoyable: The easy-to-read-and-understand chapters and over 600 illustrations assist visual learners with content comprehension. The book comprises 17 chapters, starting with a brief history of the internal combustion engine and ending with a chapter on troubleshooting various conditions found on any power equipment engine. Both two-stroke and four-stroke engines are covered. PEET can be used not only by pre-entry-level technicians but also as a reference manual by practicing technicians, and it will be helpful for the general consumer of power equipment engines that has an interest in understanding how they work. In today's world, an education prior to working in the field is becoming more desirable by all shops that hire. Power equipment technicians are currently sought after and will continue to be in demand in the future as technology advances in the manufacturing of modern power equipment engines.
