These changes can and should empower people with the opportunity to develop partnerships based on their own sexualities, understandings, and agreements. This makes it possible to create what Kenneth Haslam, founder of the Kinsey Institute's Polyamory Archive, has called "designer relationships." Designer relationships may encompass: people who bond emotionally but not sexually; people who agree to be non-exclusive; single people who have occasional lovers or friends with benefits; multiple partner configurations where long-term bonds exist among all or some; partnerships in which people are kinky and that make room to explore kink. The possibilities are**

limitless, and thinking about a partnership as something people can craft allows for flexibility and change. Relationships can open and close or have varying degrees and kinds of openness as circumstances demand. In the context of a designer relationship, decisions are made mutually, consciously, and deliberately. Best-selling authors and nationally known relationship experts Patricia Johnson and Mark A. Michaels are exemplars of this life choice, and have studied polyamory for over 20 years. This book explains exactly how you and your loved ones can design your own life and love.

**not all relationships are the same. What works for some people certainly does not suit others. Love and affection need not be confined to labels and strict definitions, because the spectrum of what constitutes a relationship is broader than many people imagine. The foundation of a great relationship is built on a solid platform comprised of love, trust, respect and above all, communication. But there are so many different ways of expressing these things, and no relationship is "one size fits all." For many people, the phrase "traditional relationship" conjures an image of a subordinate woman, with the man ruling the roost. While this is no longer seen as an absolute standard, it still has resonance with lots of people. And while a large majority of people prefer a more egalitarian approach to relationships, that doesn't work for everyone either. Female led relationships are often misunderstood, but are more common than you might think. In this type of relationship, the woman is the dominant partner and her partner is the willing subordinate. We'll be exploring the dynamics of this type of relationship in this guide, and the various aspects and benefits it has to offer. You may find yourself more intrigued than ever before.
