Competitive Strategies for the 21st Century Dec 14 2019 The U.S. today faces the most complex and challenging security environment in recent memory— even as it deals with growing constraints on its ability to respond to threats. Its most consequential challenge is the rise of China, which increasingly has the capability to deny the U.S. access to areas of vital national interest and to undermine alliances that have underpinned regional stability for over half a century. Thus, the time is right for the U.S. to adopt a long-term strategy for dealing with China; one that includes but is not limited to military means, and that fully includes U.S. allies in the region. This book uses the theory and practice of peacetime great-power strategic competition to derive recommendations for just such a strategy. After examining the theory of peacetime strategic competition, it assesses the U.S.-China military balance in depth, considers the role of America's allies in the region, and explores strategies that the U.S could adopt to improve its strategic position relative to China over the long term.

Strategies of Silence Apr 29 2021 This unique book takes silence as its central concept and questions the range of meanings and values which inform the idea as it impinges on the creative process and its content and contexts. The thematic core of silence allows a consideration of silencing and silence as opposite ends of a spectrum: one shutting down, the other enabling and opening up. As a multidisciplinary collection of essays derived from the teaching and implementation of Creative Writing at university level, the contributors consider silence as strategic, both through the need for silence and as something which compels resistance. They explore how writing has employed images and tropes of silence in the past, and used silence and gaps technically. In considering marginalised and forgotten voices, this book shows how writers bring their diverse range of backgrounds and experience to work with and against silence in Creative Writing Studies. The first theoretical work on silence in Creative Writing, this field-shifting book is an essential read for both practitioners and students of Creative Writing at the higher education level.

Cambridge Handbook of Strategy as Practice Mar 29 2021 Now in its second edition, this extended and thoroughly updated handbook introduces researchers and students to the growing range of theoretical and methodological perspectives being developed in the vibrant field of strategy as practice. With new authors and additional chapters, it shows how the strategy as practice approach in strategic management moves away from disembodied and asocial studies of firm assets, technologies and practices to explore and explain the contribution that strategizing makes to people working at all levels of an organization. It breaks down many of the traditional paradigmatic barriers in strategy to investigate who the strategists are, what they do, how they do it, and what the consequences or outcomes of their actions are. This essential work summarizes recent developments in the field while presenting a clear agenda for future research.

Adaptive Treatment Strategies in Practice: Planning Trials and Analyzing Data for Personalized Medicine Jan 07 2022 Personalized medicine is a medical paradigm that emphasizes systematic use of individual patient information to optimize that patient's health care, particularly in managing chronic conditions and treating cancer. In the statistical literature, sequential decision making is known as an adaptive treatment strategy (ATS) or a dynamic treatment regime (DTR). The field of DTRs emerges at the interface of statistics, machine learning, and biomedical science to provide a data-driven framework for precision medicine. The authors provide a learning-by-seeing approach to the development of ATSs, aimed at a broad audience of health researchers. All estimation procedures used are described in sufficient heuristic and technical detail so that less quantitative readers can understand the broad principles underlying the approaches. At the same time, more quantitative readers can implement these practices. This book provides the most up-to-date summary of the current state of the statistical research in personalized medicine; contains chapters by leaders in the area from both the statistics and computer sciences fields; and also contains a range of practical advice, introductory and expository materials, and case studies.

Learning In The Workplace Jul 01 2021 Learning in the workplace has come of age with the publication of this book. It shows the way for a new level of sophistication in the ways learning and work are treated. And it opens new territory for exploration in the world of learning throughout life. David Boud, University of Technology, Sydney Stephen Billett provides a comprehensive and practical model, well-grounded in theory and research, to guide learning in the workplace. This is a 'must read' for those in vocational education and training. Victoria Marsick, Columbia University Learning does not stop when you leave school or tertiary studies, but continues throughout life. This is all very well in theory, but how does learning actually occur in the workplace? Drawing on research of a wide variety of workplaces in different countries, Stephen Billett analyses the strengths and limitations of 'on-the-job' learning. He outlines what knowledge individuals need and how they can best acquire this knowledge in workplace settings. He shows how to develop a workplace curriculum, and how it can be implemented in organisations of different sizes. Learning in the Workplace offers a comprehensive
