Copper Lake Confidential Nov 03 2020 A house with a dark history After a miscarriage and over a year in a psychiatric hospital, Macy Howard is ready to revisit her old home in Copper Lake, Georgia—a town tainted by memory. When she returns, Macy meets Stephen Noble, an author and veterinarian, who doesn't know about Macy's troubled past.

Stephen finds her irresistible, and, finally, Macy feels willing to trust another man. With her family's help, Macy packs up old remnants—eager to usher in new beginnings. Her future seems hopeful—until strange things start happening in the house: stirrings in the windows...items turning up in unexpected places...lingering scents that don't belong. Is Macy slowly descending into madness? Or is something more sinister at work in Copper Lake?

Multiple Sclerosis Oct 14 2021 Written for students interested in learning about multiple sclerosis, this book describes how this frequently disabling disease affects patients, exploring its effects on minds, bodies, and daily lives. Written by a professor of medicine who is also personally affected by the disease, Multiple Sclerosis offers an overview of every aspect of the condition. It begins by introducing the central nervous system and describing how multiple sclerosis affects the brain and spinal cord. The author then reviews early understanding of MS, how it was first recognized as a disease, and the discoveries that have helped explain its causes.

Moving to contemporary understanding of multiple sclerosis, the book explores the epidemiology of MS in the United States and around the world, describes MS symptoms, and reviews today's treatments and research directions. Perhaps most important, it presents the experiences of persons living with multiple sclerosis, concluding with a discussion of factors affecting these individuals in their homes, families, and communities. A timeline of key discoveries and events relating to MS over the last 500 years Medical drawings and schematics showing causes and possible effects of MS A schematic map of the world showing the gradient of MS prevalence rates

Modern TRIZ Modeling in Master Programs

Nov 27 2022 The book is addressed to Master students, senior students of universities, professors working at Master Programs, as well as researchers, engineers and managers of all industries without restrictions. Examples and illustrations of the book give a vivid impression of the spectrum of creative models of Modern TRIZ, which can be opened in any design and managerial decisions. The book is especially useful for students for performing TRIZ modeling and for inventing original ideas at Master Programs. The book is indispensable for passing Master Programs led by the author at the MTRIZ Academy.

Writer's Secret Weapon Jun 29 2020 At some point all of us find ourselves staring at a page, needing some idea spark to help us move forward. Maybe it's an unusual pet's name, or a career in a particular field, or the right type of weapon for a scene. Maybe you're struggling with finding the right character goal or motivation, ideas for adding in the five senses, or your character's physical description. Along with useful tips for all fiction writers, you'll find lists of quick ideas for story components to keep you going throughout the process—whether you're just starting your outline, putting together the character biographies, in the middle of your novel, trying to meet a deadline, or stuck with writer's block. *Writer's Secret Weapon* presents quick ideas to get you going in a number of areas. While we all know how to Google, it's harder to come by fast and easy rules. This guide saves you hours of searching, especially when you don't know where to start.

Discover the kind of information new and veteran authors need at every stage of their career! -- "The *Writer's Secret Weapon* is a one-stop shop for brainstorming, story planning, or simply sparking creativity. Tons of plot, character, scene, and story arc writing prompts packed into one space! Sure to get you started on a novel or unstuck from the middle of one." -- NY Times bestselling author Jennifer Ashley

Scooter Apr 20 2022 From the author of "Tietam Brown" comes a novel set in the Bronx in 1964--one that explores moments of courage, moments of cowardice, and a life that revolves around Yankee pennants and close-knit family ties.

Kemlo and the Masters of Space Jan 29 2023 As

Kartin says, 'You can't have houses in space.' What then are those mysterious objects that have suddenly appeared far out on the planet routes? What connection do they have with 'the Shy Six Hundred', as Kemlo calls them, those strange, Earth-born visitors to Satellite K who are so chary of having their photographs taken? Kemlo and his Space Scouts decide that the time has come for a little detective work and the boys are soon hot on the trail - a trail which is to lead them from the comfort and security of the satellite to a battle to the death twenty million miles out into the void.

Building a Special with Ant Anstead Master

Mechanic Dec 24 2019 Ant Anstead's Building a

Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine,

fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

Having this book in your pocket is just like having a real marque expert by your side. Learn how to spot a bad scooter quickly and how to assess a promising one like a professional. Get the right classic Vespa at the right price!

On the Wings of Heroes Apr 27 2020 A boy in Illinois remembers the homefront years of World War II, especially his two heroes--his brother in the Air Force and his father, who fought in the previous war.

The Spyglass Tree Oct 22 2019 By "our premier writer about jazz and the blues . . . and a fictional tale spinner in the grand Southern tradition" (Washington Post Book World), *The Spyglass Tree* is a deeply affecting novel of elegant, lyrical reminiscence and profound sophistication about a young black man's advent into the world of academia—an imaginary Alabama college—in the 1930s. Admire the excitement of the world of ideas and adventures with new friends, Scooter sallies into "the territory of the blues," where recollection becomes legend. Here he learns to deal with the vicissitudes of life—the complexities of family ties and camaraderie, his sexuality, pride of excellence in school, the darker realities of history and human passion—through confrontation and improvisation, and with style and courage. "[*The Spyglass Tree*] strikes a perfect balance between the black folk tradition and Faulknerian rumination. . . . One reads this very fine novel for the glissando effect of its language, the vibrancy of its characters and the unabashed pleasure Mr. Murray takes in nostalgia for its own sake . . . with level-headed clarity and honesty."—The New York Times Book Review

Popular Science Apr 08 2021 Popular Science gives our readers the information and tools to improve their technology and their world. Proficient Motorcycling Jun 10 2021 This best-selling book is also "#1 book in motorcycle safety" (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called "Motorcycle Dynamics," Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider's safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider's braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called "Cornering Habits" is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough's skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The

detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough's voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

Training in Neurorehabilitation Oct 26 2022 Training in Neurorehabilitation The importance of physical therapy for neurological disease cannot be underestimated. Stroke, for example, is the second leading cause of death worldwide, and its global effect is considerable, based on disability-adjusted life years. With an aging population, the risk of stroke increases exponentially with age, and accordingly, the number of patients increases as well. It follows that specially tailored neurorehabilitation regimens are crucial in helping patients return to the workplace and maintain their independence. This concise and practical work, created by authors with decades of experience in

the practice and teaching of physical therapy, serves that purpose well, with its emphasis on the targeted use of training equipment to match the patients' exact needs. Key Features: Concise, practical, and goal-oriented Provides expert guidance in creating individualized training regimens with the goal of training and enhancing endurance, strength, and balance An emphasis on types of equipment and instructions for their use, tailored specifically the individual needs of patients All training exercises are well illustrated for optimal understanding Author team with more than 30 years' experience in practice and teaching of physical therapy Lamprecht's Training in Neurorehabilitation is certain to be an essential reference for all students and practitioners in physical therapy involved in the treatment of patients with neurological disorders. Sabine and Hans Lamprecht run a successful physical therapy practice in Kirchheim, Germany, where, in addition to treating patients, they also provide advanced training courses for physical therapists nationwide.

Allied Coastal Forces of World War II:

Volume I Nov 22 2019 The major contribution made by Coastal Forces to the Allied war effort has had surprisingly little coverage in the literature of the Second World War. Motor torpedo boats, PT boats, motor gunboats, launches and submarine chasers served with distinction throughout the War, and in every theatre. They performed invaluable service as patrol boats, convoy escorts, minelayers and minesweepers, harbour defence vessels, light landing craft, RAF rescue boats and transports

for agents and clandestine missions. Allied Coastal Forces, now a recognised classic work and first published in 1990, remains the only publication to deal comprehensively in words, photographs and drawings with the technical detail of all these boats. Design, construction and subsequent development are all covered, and the builders, construction lists, fates and the technical data are given for each type. Separate sections cover armament and equipment, sea-going qualities and habitability. This first volume covers all the designs of the Fairmile Marine Company (including those craft built and equipped for Canada), together with the 72ft Harbour Defence Motor Launch and the US Navy 110ft subchaser. The authors, firmly established as the recognised authorities on small warships, unearthed a remarkable body of information now included in this major work, and their finely detailed drawings, redrawn from original builders plans, offer an unparalleled view of all these remarkable designs. The new editions of their work will be welcomed by naval enthusiasts and modellers alike.
