Excerpt from The Sunday-School Teacher's Manual, Designed as an Aid to Teachers in Preparing Sunday-School Lessons IT is hoped that this Manual will meet the needs of the Sunday-school teacher. Its purpose is not only to furnish instruction in approved methods of preparing and teaching the lesson, but also to impart the information concerning the Scriptures and the Church, which often lies beyond his immediate reach. The various articles contained in it, have been reduced to as small a compass as the usefulness of the book will permit; and it can readily be seen that it was no easy task to bring within the stipulated limits many of the subjects treated. Further, each author is responsible only for the matter contained in his own production. The books of reference have been carefully selected from a large number of valuable treatises and, as a rule, placed in the order of their helpfulness. The studious teacher will find these books useful in giving him that knowledge, which the requirement of brevity necessarily excluded from the Manual itself. Excerpt from The Teacher's Manual of Lessons on Domestic Economy The following Manual for teachers in public and private schools, and for students in training colleges, aims at a distinctive mode

of presenting the subject. It is specially designed to meet the new Government requirements in teaching Domestic Economy as a class subject. Instead of furnishing materials and methods suited only to the upper classes taking specific subjects, it provides for the necessary lessons in each class. Thus, at first, only easy experiments and the simplest explanation are made use of; more complicated experiments and more strictly theoretical exposition are introduced very gradually. Again, each portion of the subject is here generally treated in a three fold way. First, a large number of facts are tersely but clearly stated, as Information for the Teacher, so that she may herself fully understand the subject she is handling. Next, the same subject is treated in the early stages as a Specimen Lesson for Teachers, that they may know how to deal practically with the materials for teaching purposes. And lastly, very compendious Notes of Lessons on the same items are drawn up, for use before the class as memory-helps to recall the heads and subdivisions of the Specimen Lessons. The author has been led to adopt in this book this threefold method of pre scutation by his experience in practical teaching. He has taught the subject in this way in Demonstration Lectures to a class of head and assistant mistresses, and in Specimen and Model Lessons in girls' and mixed schools, and his experience encourages the belief that other teachers will find the method valuable. Nothing found to be beyond the comprehension of the children has been retained in these pages; while those aspects which have been found to awaken the greatest interest in the class have been brought forward most prominently in the Manual. The book is self-contained for the purposes for which it is written. All compilation work necessary for the Notes of Lessons has been done by the author, so that the teacher may have more time for herself to study and think out the suggestions in the specimen lessons. Excerpt from Teacher's Manual for the Andrews Lunar Tellurian To The Teacher: In the preparation of this Manual the writer has endeavored to treat the subjects presented, in a simple yet forcible manner, avoiding as much as possible, technical

terms. The illustrations given outline the work that should be done in the class-room. The teacher should, and no doubt will supplement these illustrations in many ways, presenting the subjects treated, step by step in a thorough and yet attractive manner. The value of demonstration is no longer doubted, and in those schools where it is most used the best results follow. This is pre-eminently true in geographical and astronomical work. The Lunar Tellurian is designed to furnish the illustrations necessary to give the pupils a comprehensive understanding of the relationship, of the earth, sun and moon. It is so simple in construction that the average teacher may use it to advantage after a few hours' study with the Manual. The teacher will find it advantageous to now and then assign a topic to one of the pupils, and require him to furnish clear and forcible demonstrations by use of the apparatus. The teacher's attention is particularly called to the section in which Prof. E. Colbert, now scientific editor of the Chicago Tribune, and well known as a practical astronomer, treats the subject of Tides. His presentation is new, having reduced the abstract to the concrete. The author congratulates the readers upon being able to present an article from the pen of Prof. Colbert here acknowledges obligations to that estimable and scholarly gentleman. The writer acknowledges his obligations to M. Mac Vicar Ph.D., of the Michigan State Normal School - than whom there is no better authority on mathematical geography - some of whose illustrations the writer has embodied, in this work. Excerpt from Teacher's Manual for the Teachings of Jesus Br way of introduction it might be shown how a man's thought of God Shapes all the rest Of his thinking, his thought of life, of duty, of religion, his hope for the future. That is one reason Why we begin with this doctrine in the teaching Of Jesus. But the main reason is that this was Jesus' greatest word to men, as it was the all-controlling reality of his life, God the Father. Here, as elsewhere, it is helpful to compare Jesus' teaching with what went before, noting how he continues what went before and, on the other hand, how he surpasses it. In estimating the thought of the Old Testament about God we must not consider single passages here and there, but the dominant idea. Looking thus, we see that in the Old Testament God was King, in the New Testament he is Father. And yet for Jesus he is King as well as Father. We have here another lesson in which we must simplify and select. The best plan will be to group the teaching around the two phrases used as headings: The King is Father; the Father is King. The purpose Of the lesson is to bring out clearly this great conception of Jesus, and so lay the foundation for all the later study. I. The King is Father. Note how simple this idea is as compared with other conceptions of God; a child can understand this. Show how rich it is and how much it involves. Then consider the tremendous faith of Jesus; he believed that love really sat on the

throne Of the world. Do we really believe that? That rather belongs to the second part: II. The Father is King. This part Of the lesson will need special emphasis and development. The Old theologians emphasized God's sovereignty, modern thought emphasizes his Fatherhood; but Jesus includes both. We need a revival of this idea Of sovereignty. Here are rich practical lessons. The Blocki Flute Method's unique approach to teaching Five-Note patterns has proven to consistently help even the youngest students develop exceptional technical abilities. Five-note patterns are used as the foundation for teaching new notes, technique, moving between beat levels, simple transposition and fun and easy ear training. As of August 2010: The Blocki Flute Method has been completely updated with the Third Edition. Listen to Samples Katelyn After One and a Half Years of Lessons - YouTube Video What's New in the Third Edition? After using the method for over 10 years, we knew which pieces the students loved and which one were just "okay." Anything that was just "okay" has been replaced with kid tested exciting pieces. There are many new duets and since students love trills we've included many more. These trills have transformed boring octave exercises into motivating pieces such as Half Pipe Stunts, Trampoline Tricks, and Bungee Jumping A's. Other new favorites include the Yankee Doodle Theme and Variations, The Sad Singing Swan, and the Daring Detective.
