Nursing Care Plans Nov 03 2020

Care Planning Sep 01 2020 This clear and intuitive introduction to care planning for nurses explains the benefits of holistic, individualised care planning from a professional and clinical perspective. Using the ASPIRE model, it guides the reader step-by-step through a problem-solving approach to care, from assessing patients and identifying their needs, to planning goals and interventions, and evaluating progress. The book is structured to explain the theory of care planning in relation to a number of common nursing models and then show how the theory can best be put into practice. It draws on recent research to show how nurses can develop individualised care plans from scratch or use and adapt a range of 'off-the-shelf' tools. It is written in a clear, succinct and down-to-earth writing style, which will put students immediately at their ease, and is rich with pedagogic features, including: 'Stop and think' boxes to check understanding; boxed 'Practice examples' to illustrate points made; 'Research summary' boxes to highlight relevant and important studies; 'What have you learnt so far?' features to recap on key points of discussion; mini care plans; regular activities to encourage the reader to apply what they have learnt to particular practice scenarios. This is a go-to text for all pre-registration nursing students taking courses on the theory and practice of effective healthcare delivery.

Conceptual Nursing Care Planning Dec 24 2019 73 conceptual nursing care plans are based on Giddens concepts. Logical format for conceptual nursing care plans includes a definition of the concept, clinical problems, common causes, manifestations, outcomes, interventions, related concepts, and related clinical problems. Guidance for prioritized care planning organizes interventions in an assess-intervene-teach format, to help identify the most important priority interventions for patients. Use of standardized nursing language conveys concepts and clinical problems in easily understandable language that is commonly used in clinical settings, organizing care plans around terminology recognized by the American Nurses Association and easily understood by other healthcare professionals. UNIQUE! Wide-ranging approach covers concepts that are not addressed in other texts, such as health disparities, risk in pregnancy, impaired immunity, substance use, sensory deficits, continuity of care, and the dying process. Introduction opens the book by explaining the components of a conceptual nursing care plan and how to use the book to create patient-centered nursing care plans. Conceptual Care Map Creator on the Evolve website helps document care planning projects and clinical assignments. Expert authors Mariann Harding and Debra Hagler are nursing thought leaders and editors of the bestselling Lewis's Medical Surgical Nursing: Assessment and Management of Clinical Problems.

All-in-One Care Planning Resource Jul 23 2022 The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. Home Health Nursing Sep 13 2021 This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Dying in America Oct 22 2019 For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. *Dying in America* is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. *Dying in America* evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.
